Cards will not have cash access and can be used everywhere MasterCard® cards are accepted.

*AIR OPTIX® for ASTIGMATISM (Iotrafalcon B) contact lenses: High oxygen transmissible lenses. Dk/t = 108 @ -3.00D, -1.25 D X 180. AIR OPTIX® AQUA (Iotrafalcon B) contact lenses: High oxygen transmissible lenses. Dk/t = 138 @ -3.00D. AIR OPTIX® AQUA MULTIFOCAL (Iotrafalcon B) contact lenses: High oxygen transmissible lenses. Dk/t = 138 @ -3.00D. AIR OPTIX® NIGHT & DAY® AQUA (Iotrafalcon A) contact lenses: High oxygen transmissible lenses. Dk/t = 175 @ -3.00D. Other factors may impact eye health.

Important information for AIR OPTIX® for ASTIGMATISM (Iotrafalcon B) contact lenses, AIR OPTIX® AQUA (Iotrafalcon B) contact lenses, AIR OPTIX® AQUA MULTIFOCAL (Iotrafalcon B) contact lenses: For daily wear or extended wear up to 6 nights for near/far-sightedness, astigmatism and/or presbyopia. Risk of serious eye problems (i.e., corneal ulcer) is greater for extended wear. In rare cases, loss of vision may result. Side effects like discomfort, mild burning or stinging may occur.

Important information for AIR OPTIX® NIGHT & DAY® AQUA (Iotrafalcon A) contact lenses: AIR OPTIX® NIGHT & DAY® AQUA contact lenses are indicated for vision correction for daily wear (worn only while awake) or extended wear (worn while awake and asleep) for up to 30 nights. **Relevant Warnings:** A corneal ulcer may develop rapidly and cause eye pain, redness or blurry vision as it progresses. If left untreated, a scar, and in rare cases loss of vision, may result. The risk of serious problems is greater for extended wear vs. daily wear and smoking increases this risk. A one-year post-market study found 0.18% (18 out of 10,000) of wearers developed a severe corneal infection, with 0.04% (4 out of 10,000) of wearers experiencing a permanent reduction in vision by two or more rows of letters on an eye chart. **Relevant Precautions:** Not everyone can wear for 30 nights. Approximately 80% of wearers can wear the lenses for extended wear. About two-thirds of wearers achieve the full 30 nights continuous wear. **Side Effects:** In clinical trials, approximately 3-5% of wearers experience at least one episode of infiltrative keratitis, a localized inflammation of the cornea which may be accompanied by mild to severe pain and may require the use of antibiotic eye drops for up to one week. Other less serious side effects were conjunctivitis, lid irritation or lens discomfort including dryness, mild burning or stinging.

Contraindications: Contact lenses should not be worn if you have: eye infection or inflammation (redness and/or swelling); eye disease, injury or dryness that interferes with contact lens wear; systemic disease that may be affected by or impact lens wear; certain allergic conditions or using certain medications (ex. some eye medications). **Additional Information:** Lenses should be replaced every month. If removed before then, lenses should be cleaned and disinfected before wearing again. Always follow the eye care professional's recommended lens wear, care and replacement schedule. If you have questions, ask your eye care professional or contact Alcon at (800) 875-3001.
